

STEM NEWS –October 2015 –Nov 2015

(Science, Technology, Engineering and Maths.)

Dear Teachers,

Welcome to STEM Cumbria's latest newsletter, packed with opportunities and exiting STEM events that aim to raise student's awareness of the rich choice of fulfilling and well paid STEM careers. We have been busy in the office this term preparing for The Big Bang South to be held at Furness College 22nd and 23rd October and also Big Bang Carlisle 2nd Dec 2015. This is our final Big Bang of five events that we have run in the County, covering all areas and every school.

Please contact me on amanda@stemcumbria.co.uk for booking and getting one of our inspirational co-ordinators into your school. For all of you asking,

**STEM Ambassadors.
subject to availability.**

Available to all

Visit www.stemnet.org.uk for STEM Ambassador information

In Cumbria we are fortunate to have just over 900 STEM Ambassadors registered who are a free resource, depending on availability, accessible by all schools to help in delivering STEM subjects in schools and to offer hands on careers advice and to share their experiences where possible. Our

Ambassadors all work and represent industry and companies such as Sellafield, BAE Systems, TFP, Croppers, Innovia, Glaxo Smith Kline.

STEMNET
Science, Technology, Engineering
and Mathematics Network

STEMNET

STEMNET creates opportunities to inspire young people in Science, Technology, Engineering and Mathematics (STEM). This enables young people to develop their creativity, problem-solving and employability skills, widens their choices and supports the UK's future competitiveness.

STEMNET helps encourage young people to be well informed about STEM, fully in debate, and make decisions about STEM related issues.

STEMNET has received funding from the Department of Trade and Industry since 1996 and now continues to enjoy support from the Department for Business, Innovation, and Skills and the Department for Education. As a national organisation, it works hard to ensure that no region of the country is disadvantaged, by comparison with any other, with respect to STEM opportunities.

Science4society week

14th-20th March 2016

Follow the link for a set of inspiring science education activities for young people organised by Scientists for Global Responsibility. The activities focus on the positive contribution that science, design and technology can make to peace, social justice and environmental sustainability.

Science4Society Week 2016 will run from 14-20 March 2016. New for this year is our ['Design an Eco-Community'](#) competition. Additionally we have teaching resources and there will be trips and tours.

British Science Week

13th March-22nd March 2016

British Science Week (BSW) is a ten-day celebration of science, technology, engineering and maths - featuring fascinating, entertaining and engaging events and activities across the UK for people of all ages.

BSW provides a platform to stimulate and support teachers, STEM professionals, science communicators and the general public to produce and participate in STEM events and activities.

Anyone can organise an event or activity, and the British Science Association helps organisers plan by providing free activity and support resources. We welcome and support any type of organiser, from schools to community groups, from parents to large organisations. The resulting programme of events is a hugely varied and eclectic mix.

British Science Week 2016 will take place 13 - 22 March.

[To discover more on how you can get involved with British Science Week, including registering your event or finding an event near you please visit our microsite - www.britishscienceweek.org](#)

Best wishes
