

MANAGEMENT REPORT

(July - September 2009)

ECOSANTAFE

Education Program

We visited the Schools of Jericó telling to children what Ecosantafé is and why it is in Jericó now. Some children, the neighbors, visited the Rehabilitation Center and they can to know the keepers and animals and see our work.

More over the education continued in La Pintada and on September 30th we celebrated the Red Howler Monkey and Green Macaw Festival.

The Rehabilitation Center

We continue in Jericó in the La Suiza Farm. The owners of the farm are interesting that we stay in their land because they have a project of conservation in the site. For this they and we will fill a rent contract for one year. But we want to do a offer of buy a piece of land, maybe they can sell to us cheap and we can do a campaign to obtain funds. The land is not cheaper but we could negotiate with them the cost. 1 hectare cost US15.000

On August 24 was filled the contract with Area Metropolitana del Valle de Aburrá (Metropolitan Environmental Authority) to development the protocols of rehabilitation to red howler monkeys, the maintaining of baby red howler monkeys in the zoo and development of educative strategy in Metropolitan Area focus in red howler monkeys, macaws and paujiles. This contract is until December 31th for a cost of \$70.000.000 (Seventy millions of pesos)

Productive Projects

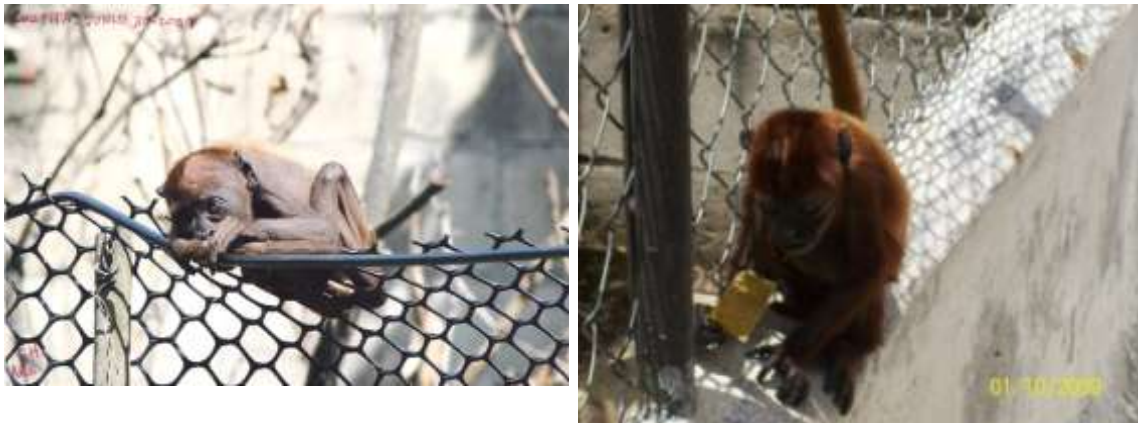

We were promoting the products of Proyecto Titi (some bags) in August and September because Proyecto Titi done a agreement with ACOPAZOA (Colombian Asociation of Zoological Parks and Aquariums) for selling their products and celebrate the day of Titi (Cotton top Tamarin).

Unfortunately we can't sell the bags. The people say that the bags are nice and it like to them but don't buy anything.

We hope that Proyecto Tití and ECOSANTAFE will can work together and aid each other.

Some baby monkeys

On this period of time the majority of monkeys that have arrived to Ecosantafe are females.

Chispitas. She arrived on June 19th. She had a skin infection (like itch of dog). She is very good today and she is the leader of her group.

Bonita. She comes on August 19th in very good conditions. She arrived from Bogotá from Rescue Center of National University (URRAS).

Camila arrived on August 22th; she looked very thin with bad nutrition and without hair in some areas of her body. She is better now.

Pirri come on September 10 th. He had a hear hurt, but now he is very good, he is a younger monkey of his group but he is a leader male.

Tabata arrived on September 11th in good conditions.

Rojito come on from Caldas on September 20th. He has itch too. More over he has a psychological fixation with his penne but he is under medical supervision.
