

MOULD ERADICATION AND PREVENTION KIT

The WykaMould M.E.P Kit contains:-

- 1 x 250ml MCS1 Mouldclear Concentrate 5X
- 1 x 250ml MCS2 Biobond Stabiliser Concentrate
- 2 x 50ml MCS3 WykaMould Fungicidal Additive
- 1 x Pair of Safety Gloves
- 1 x Pair of Safety Glasses
- 1 x Paint Brush
- 1 x Cleaning Sponge
- 1 x Mixing Bucket

Instructions for use overleaf

THREE EASY STAGES.

To kill mould growth on walls ceilings, window reveals, frames, doors skirting boards etc. -These instructions need to be followed carefully. There are three stages, with each stage it is vital to treat the visible mould PLUS 1 metre (approx 3ft) beyond in all directions.

STAGE 1.

Use MCS1 Mouldclear Concentrate 5X to kill surface mould on painted and papered and timber areas - dilute as per label, 1 part MCS1 to 4 parts warm water.in bucket provided and apply with sponge or brush.

Areas to be treated

- a) Painted and timber areas - apply MCS1 thoroughly with sponge provided.
- b) Papered areas - as above strip the paper. MCS1 acts as a biocide and stripping agent. Bag the mould contaminated paper and remove from the property, then treat the now exposed plaster again as per a)
- c) General preparation - once the surface is dry, scrape off any loose flaking paint and rub down. Previously painted surfaces must be etched using sandpaper or similar before stage 2.

STAGE 2

Use MCS2 Biobond Stabiliser Concentrate to kill the root system of the mould growth in the plaster. Dilute 1 part MCS2 with 4 parts warm water and apply with the bursh provided. Allow to dry.

STAGE 3

MCS3 WykaMould Fungicidal Additive is specifically formulated to protect decorative finishes from future mould attack. This should be mixed into emulsion paint, primer, undercoat, varnish, gloss, wallpaper paste, textured paint and tile adhesive.

One 50ml container of MCS3 must be added to every 2.5 litres of waterbased product and to 5 litres of solvent based product to ensure optimum results. THOROUGH STIRRING OF MCS3 IS ESSENTIAL.

HEALTH AND SAFETY

All MCS products are approved under the COPR 1986 regulations for use as directed. READ THE LABELS BEFORE USE and ensure you follow necessary safety precautions.

MCS1 Mouldclear Concentrate 5X - HSE No. 7667. Contains: Benzalkonium Chloride 4.76% w/w, 2-Phenylphenol 1.18% w/w.

MCS2 Biobond Stabiliser Concentrate - HSE No. 7664. Contains: Disodium Octaborate 4.88% w/w.

MCS3 WykaMould Fungicidal Additive - HSE No. 7656. Contains 3-Ido-2-Propynyl-n-Butyl Carbamate 14.85% w/w

MCS1, MCS2 AND MCS3 ARE ALL APPROVED FOR BOTH AMATEUR AND PROFESSIONAL USERS.
